It will appear by referring to Columns Nos 12 and 13. that the fall Wheat was almost a failure last year on account of the Midge

The early Spring Wheat suffered from the same cause, the late Spring Wheat called the Fife wheat suffered but little

Barley, Peas and Oats were over an average crop

Potatoes yeilded abundantly but a large portion was destroyed by the rot subject to that root.

The Farmers in this section of the country have turned their attention of late more to the Breeding of Horses than to the raising of Cattle or Sheep
